

## Case Study Lawrence Baker

### Client Vision

Developing a new care home based in Ware, Hertfordshire, Lawrence Baker wanted to provide residents with an area within which they could really enjoy the outdoors. Their vision for this was a wooden gazebo with outdoor kitchen to provide a complete outdoor cooking and dining experience.

### Why they chose us

At the initial enquiry, Lawrence Baker were pursuing premium outdoor kitchen equipment, to provide a long lasting and high quality outdoor cooking experience. They then realised The Lapa Company supply more than just outdoor kitchen equipment, and that we could also design and build the bespoke gazebo they required, along with landscaping the surrounding area. Providing them a complete solution from one supplier.

### Our proposal and value

To accommodate budget requirements, the accepted proposal was for a handcrafted hardwood structure complete with slab flooring, cedar shingle roof and BeefEater branded outdoor kitchen.

## Project time

The initial enquiry was made in September 2016 with designs finalised in March 2017. The installation took place over three weeks in June 2017 and the project was finished on time and within budget.

## Materials used

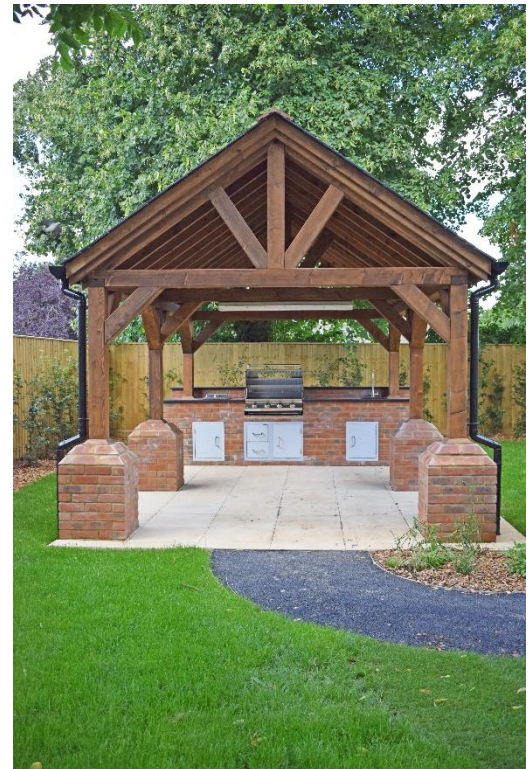

- Treated hardwood structure
- Cedar shingle roof
- Concrete slab flooring with bespoke galvanised posts and resin anchors.
- Beefeater S3000S Series 4 burner BBQ - Stainless Steel Pack
- Signature Built-in Side Burner – Stainless Steel
- Signature Dual Drawer & Single Door Combo – Stainless Steel
- Franke Sink & Tap Silksteel
- 2 x Signature Single Door – Stainless Steel

## Overcoming difficulties

Unfortunately, there was no vehicle access to the site, so heavy equipment had to be carried onto the actual site. Whilst this is not unusual for our projects, it can cause additional pressure to timescales.

## Project value

Under £30,000
