## Thatched Spa Gazebos

The simple, elegant design of the Thatch Spa Gazebo not only creates privacy for your hot tub or spa, but also provides a stunning focal point in any garden.

Manufactured from the highest quality machined timber and featuring a unique thatched roof it is available in two sizes.

The thatch roofing system is easy to install and means that the gazebo can be supplied fully assembled, or in kit form for self assembly.

## Bar Kit

Our Thatched Hot Tub Gazebos can be complimented with a matching bar and stool kit. Each kit contains 4 stools and a fitted bar that are robustly designed and are easily installed.

Perfect for when you are using your spa to entertain guests.

## Roof Lining & Canvas Panels

Our range of canvas roof liners provide an attractive finish for the inside of the Gazebo and have added benefit of providing a 100% watertight lining. The canvas side panels give added protection or privacy. Each item is manufactured from a 50% Cotton / 50% Acrylic Canvas that is UV stable and resistant to mould and fungus.
