

Instructions

You can order your Gazebo with or without a Timber floor, however in both cases it is extremely important that you provide a base to the following specification.

1. Level

The base needs to be flat and level surface. This means there should be no slope (fall) on the base from either side to side or front to back.

2. Solid

The base area must have a solid finish that will not move around. Suitable surfaces are strong decks, patios, concrete plinths and areas of well compacted roadstone/Type 1 or Tarmac Scalpings.

Gazebos should NOT be installed onto grass or earth.

3. Base Modifications

If the base for the gazebos is not to a satisfactory standard when we arrive to install, then we will charge for the aborted visit. For projects involving hard landscaping to perimeter of building, please liaise with the Lapa build team for exact dimensions.

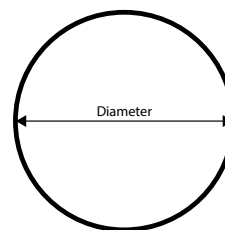

4. Size

The minimum base dimensions are as follows:

(Please note, the drawings in this document are for reference only and are not drawn to scale.)

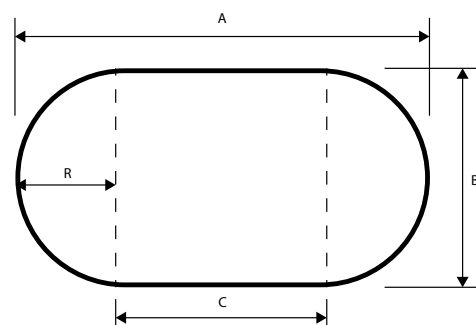

Premium Round Gazebos

 Circular	Minimum Base Diameter
2.8m diameter	2600mm
